## Food Processing Equipments

### Cutting Applications

## Continuous Type Washer

Model No.: WA 306

Giantwell Machinery Company Ltd.-Taiwan

The speed of flow of water can be controlled with the control valves on the main panel. This is to adjust the force of water as per cleansing requirement for various types of vegetables and fruits.

- 13000(L)x915(W)x1350(H)(mm)
- 2HP/415V Water Pump
- 3HP/415V Water Pump..
- 1/4HP Motor with reducer
- 1HP..Blower.
- Capacity : 500-700Kg/1Hr

Note : Technical specifications are subject to change without prior notice due to ongoing research & developments.

### FEATURES

- This machine to be used for washing Leafy Vegetables and Floating Vegetables and Fruits in Fruit Processing Units.
- It has a special mechanism for removing mud, soil and other dirt particles during continuous forward movement of Water.
- The Machine is designed with special Conveyor lift belts and with the help of nozzles strong circular and forward flow is maintained.
- The Machine has a special discharge mechanism through Conveyor belt system.
- This machine is scalable and thus the washing capacity can be increased if more than one machine is lined up flow wise.
