

# ECO COSMOS

Food Processing Equipments

## FOR LIQUID PRODUCTS

- The pumps can be used to transfer liquid, viscous and products with particles from the storage tank/mixer to the filling machine, or from the production tank to the storage tank.
- Work with electricity ( 380 Volts- 50-60 Hz)
- The volumetric piston system doesn't crush the product transferred.
- High surface smoothness and argon arc welding technology prevents contamination.
- The seals are manufactured from teflon, viton or polyethylene according to the product to be transferred.
- The parts that contact with the product are 316 L stainless steel. The other parts are 304 L stainless steel and anodized aluminum.
